

**How does
collaborative
reduction linocut
printmaking work?**

sam

coloured areas
symbolize
uncarved plate
where we roll
the ink

vanessa

Round one:

1. Everyone starts a plate.
2. Carve into plate a small amount.
3. Print up to 25 copies in light colour.
4. Then pass prints and plate to next person.

alex

grey areas are
the carved areas

caden

example:
alex's print

Between rounds we will deliver prints and plates to each other. We will either use a central drop off and pick up spot, or we will deliver them to each others homes, depending on peoples needs and boudaries. I can deliver prints and plates to people's homes within a certain geographic region.

It may take up to 1 week to transfer the prints and plates around, and this is why it's important that we all live relatively close to each other.

The area I can reach on bike:

sam

vanessa

Round two:

1. Once you receive the plate and print from round one, carve more on your friend's plate.
2. Print overtop of yellow prints in a darker colour, up to 25 copies.
3. Pass plate and prints to next person.

vanessa

caden

alex

Round three:

1. Carve more
2. Print ovetop of orange print in even darker colour, up to 25 copies.
3. Pass print along to next person.

example:
print collab w.
sam, alex, and
vanessa

sam

vanessa

alex

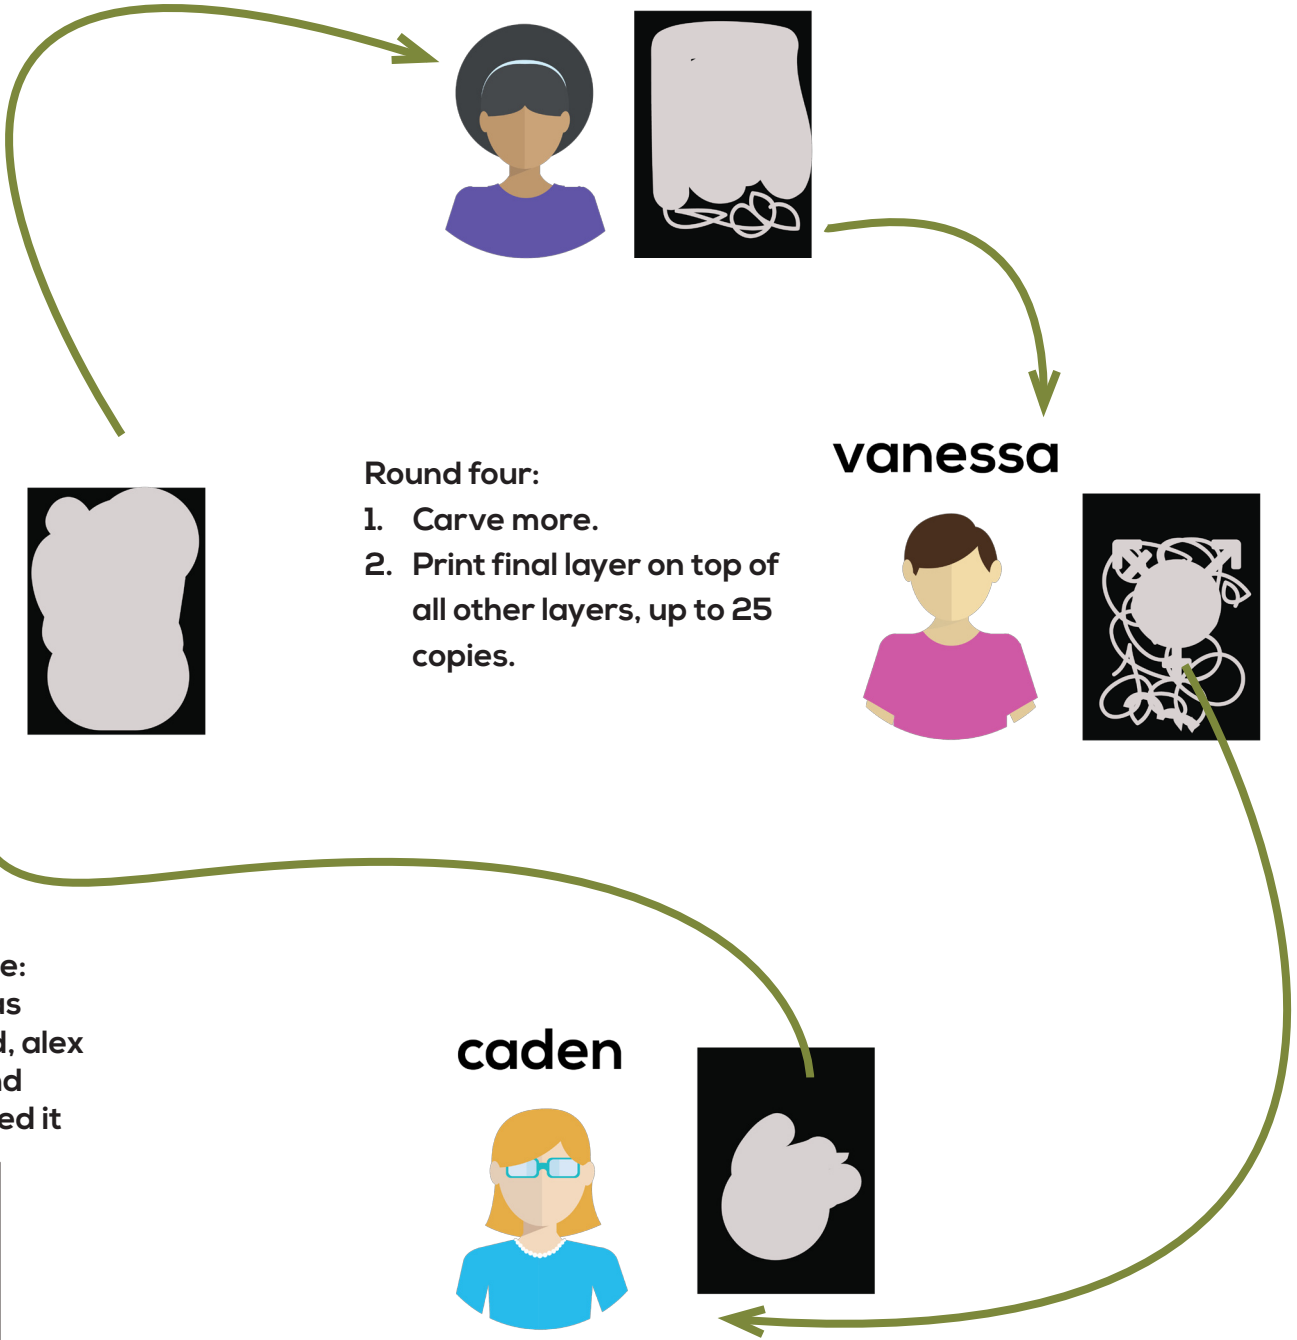

Round four:

1. Carve more.
2. Print final layer on top of all other layers, up to 25 copies.

caden

final example:
everyone has
collaborated, alex
started it and
caden finished it

Final Prints:

- Multi colour, yellow, orange, and red layer show through the black layer in areas that are carved.
- The final prints are distributed among everyone or posted in public spaces.
- Print are in reverse (compared to plates).
- Up to 25 copies each, so we could have up to 100 collaborative prints in total! However, it's very normal to make mistakes so you may have as few as 10 copies per plate or 40 in total.
- Everyone has worked on each print.
